How many types of quantification are there in AI?

- A) 2
- B) 1
- C) 4
- D) 3

السؤال التالي

Which of the following is not an application of artificial intelligence

- A) Natural Language Processing
- B) Computer Vision
- C) Digital Assistants
- D) Database Management System

The "Father of Artificial Intelligence" is:

- A) John McCarthy
- B) Charles Babbage
- C) Alan Turing
- D) Otherwise

Inference engines work on the principle of?

- A) Induction Techniques
- B) Production Techniques
- C) Both A and B
- D) Deduction Techniques

It is a searching technique for the target in the tree structure _____

- A) A* Search Algorithm
- B) Depth-First Search Algorithm
- C) Breadth-Fit Search Algorithm
- D) Otherwise

Which of the following are Heuristic Search algorithm?

- A) Best-First Algorithm
- B) Depth-First Search Algorithm
- C) Breadth-First Search Algorithm
- D) All of the above

Knowledge in AI can be represented as?

- A) Semantic Networks
- B) Predicate symbols
- C) Both A and B
- D) Otherwise

Which of the following search method takes less memory space?

- A) A* Search Algorithm
- B) Depth-First Search Algorithm
- C) Breadth-First Search Algorithm
- D) All of the above

It can be used to solve many problems in graph theory

- A) A* Search Algorithm
- B) Depth-First Search Algorithm
- C) Breadth-First Search Algorithm
- D) All of the above

Means providing the computer with optical sensors that can identify the persons and forms

- A) Knowledge Base
- B) Image Processing
- C) Machine Learning
- D) Expert Systems
